Professional Summary

Full Stack Engineer skilled in Next.js, React, Angular, TypeScript, JavaScript, Express, and Prisma. Experienced in AI-powered applications and web scraping technologies. Constantly improving my coding skills and expanding my portfolio by sharing my work online.

Technical Skills

Programming Languages: C++, JavaScript, TypeScript, HTML5, CSS3, SQL
Frontend Development: React.js, React Native, Angular 14+, Context API, TailwindCSS, Material UI
Backend Development: Clerk.js, Node.js, Express.js, RESTful APIs, JWT Authentication
Database Technologies: MongoDB, PostgreSQL, Firebase, Prisma ORM, Supabase
AI/Web Scraping: Cursor AI, Firecrawls, Voice Agents, Character AI Browser
Cloud & DevOps: Git, GitHub, Cloudflare Workers, Vercel
Testing & Tools: Postman, VS Code, npm
Core Concepts: Data Structures, Algorithms, System Design

Experience

Full Stack Developer Intern

June 2024 – Present

Raava (San Francisco, USA)

Remote

- Developed and deployed cross-platform mobile applications using **React Native (Expo)** for **iOS** and **Android**, delivering scalable solutions for B2B customers
- Built automated lead-generation and data enrichment pipelines using **Firecrawl**, **n8n**, **Python**, and **Apify** to extract, process, and structure web data for business workflows
- Designed and deployed AI voice agents using **Vapi** and **OpenAI**, automating lead qualification, customer support, and appointment booking processes
- Integrated **Stripe** payment workflows including subscription management, checkout experiences, and secure payment processing for SaaS products
- Developed AI-powered image generation features using **Nano Banana** and OpenAI models, enabling automated creative asset generation within customer-facing applications
- Built intelligent agent workflows using **OpenAI APIs** for content generation, summarization, conversational AI, and business process automation across B2B and FinTech products

Software Developer Intern

March 2025 – Present

Finora AI

Remote

- Developed AI-driven **SaaS platform** for investment advisors using **TypeScript**, **Next.js**, and **Supabase** with **RBAC/RLS** implementation
- Built interactive trade timeline (entry/stop-loss/targets) with **100%** data accuracy using **shadcn/ui** and optimized **PostgreSQL** queries
- Implemented secure **Clerk** authentication and role-based data access controls (**RBAC**) with row-level security (RLS) policies
- Created data visualization dashboards featuring **P/L** indicators and risk/reward ratios using **Recharts**
- Reduced UI load time via skeleton loaders and optimized API calls with selective stock data filtering
- Designed responsive UI components with **Lucide** icons and implemented proper state transition constraints
- Collaborated on backend architecture to ensure trade history data structure and performance

Education

Vidyalankar Institute Of Technology

2021 – 2025

Bachelor of Engineering in Electronics and Computer Engineering (CGPA: 7.5/10)

Mumbai, Maharashtra

- Relevant Coursework: Data Structures, Algorithms, Database Management

Professional Achievements

- Achieved **4-Star** Coder status on GeeksforGeeks with **1872** rating points, solving **200+** DSA problems
- Ranked in **top 20%** of LeetCode users with **500+** solved problems across various difficulty levels
- Secured **Rank 81** in Coding Ninjas Weekly Contest 127
- Achieved **Rank 33** in GeeksforGeeks Weekly Contest 156, demonstrating strong problem-solving skills
- Maintained **300+** days of consistent technical content creation on **Twitter**
