Professional Summary

Full Stack Engineer skilled in Next.js, React, Angular, TypeScript, JavaScript, Express, and Prisma. Experienced in AI-powered applications and web scraping technologies. Constantly improving my coding skills and expanding my portfolio by sharing my work online.

Technical Skills

Programming Languages: JavaScript, TypeScript, C++, SQL, HTML5, CSS3

Frontend Development: React.js, React Native, Expo, Next.js, Angular 14+, TailwindCSS, Material UI, shadcn/ui

Backend Development: Node.js, Express.js, REST APIs, JWT Authentication, Webhooks, Serverless APIs

Database Technologies: PostgreSQL, Supabase, MongoDB, Firebase, Prisma ORM

AI & Automation: OpenAI, Gemini, Vapi, Cartesia, Fal.ai, Supermemory, RAG, Firecrawl, Apify, n8n, AI Agents

Payments & Monetization: Stripe, Apple In-App Purchases, Superwall, Subscription Billing, Partner Payouts

Cloud & DevOps: Git, GitHub, Vercel, Cloudflare Workers, Postman

Core Concepts: System Design, Data Structures, Algorithms, Multi-Tenant Architecture, RBAC, Data Pipelines

Experience

Founding Full-Stack & AI Engineer

June 2025 – Present

Raava

Remote

- Joined at the idea stage and built the platform from scratch as the primary engineer, owning mobile, web, backend, AI infrastructure, payments, B2B workflows, and production deployment.
- Architected and developed **100+ REST APIs** using **Node.js, Express.js, Supabase, and PostgreSQL** for authentication, onboarding, multi-tenant access control, subscriptions, AI workflows, and media generation.
- Built and launched cross-platform applications using **React Native, Expo, iOS, and Next.js**, delivering onboarding, memory preservation, family collaboration, subscriptions, and AI-powered user experiences.
- Designed AI orchestration systems integrating **OpenAI, Gemini, Fal.ai, Vapi, Cartesia, and Supermemory** to power voice cloning, conversational AI, RAG-based memory chat, generative storytelling, and memorial video creation.
- Built large-scale obituary intelligence pipelines using **Firecrawl, LLM-based extraction workflows, Python, and Apify**, processing **500K+ obituary records** and **15K+ funeral home profiles** for B2B growth and partnership operations.
- Implemented monetization infrastructure using **Stripe, Apple In-App Purchases, and Superwall**, supporting subscriptions, paywalls, entitlement management, commission tracking, and partner payout workflows.
- Developed AI-powered marketing automation pipelines using **Seedance 2.0** and generative media workflows to create scalable UGC-style video content for growth and acquisition campaigns.

Software Developer Intern

March 2025 – June 2025

Finora AI

Remote

- Developed AI-driven **SaaS platform** for investment advisors using **TypeScript, Next.js, and Supabase** with **RBAC/RLS** implementation
- Built interactive trade timeline (entry/stop-loss/targets) with **100%** data accuracy using **shadcn/ui** and optimized **PostgreSQL** queries
- Implemented secure **Clerk** authentication and role-based data access controls (**RBAC**) with row-level security (**RLS**) policies
- Created data visualization dashboards featuring **P/L** indicators and risk/reward ratios using **Recharts**
- Reduced UI load time via skeleton loaders and optimized API calls with selective stock data filtering
- Designed responsive UI components with **Lucide** icons and implemented proper state transition constraints
- Collaborated on backend architecture to ensure trade history data structure and performance

Education

Vidyalankar Institute Of Technology

2021 – 2025

Bachelor of Engineering in Electronics and Computer Engineering (CGPA: 7.5/10)

Mumbai, Maharashtra

- Relevant Coursework: Data Structures, Algorithms, Database Management

Professional Achievements

- Achieved **4-Star** Coder status on GeeksforGeeks with **1872** rating points, solving **200+** DSA problems
- Ranked in **top 20%** of LeetCode users with **500+** solved problems across various difficulty levels
- Secured **Rank 81** in Coding Ninjas Weekly Contest 127
- Achieved **Rank 33** in GeeksforGeeks Weekly Contest 156, demonstrating strong problem-solving skills
- Maintained **365+** days of consistent technical content creation on **Twitter**
